Refrigerante R32

675 GWP

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would $contribute \ less \ to \ global \ warming \ than \ a \ refrigerant \ with \ higher \ GWP, if \ leaked \ to \ the \ atmosphere. \ This \ appliance$ $contains\ a\ refrigerant\ fluid\ with\ a\ GWP\ equal\ to\ 675.\ This\ means\ that\ if\ 1kg\ of\ this\ refrigerant\ fluid\ would\ be$ leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

Cooling mode

6.3 A^{**} 2.6 SEER Energy efficiency class Design load (Pdesignc) Energy consumption, kW

144 kWh per year, based on standard test results.

Actual energy consumption will depend on how the appliance is used and where it is located.
