Refrigerante R32 GWP 675

 $Refrigerant\ leakage\ contributes\ to\ climate\ change.\ Refrigerant\ with\ lower\ global\ warming\ potential\ (GWP)\ would$ contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2, over a $period \ of \ 100 \ years. \ Never try \ to \ interfere \ with \ the \ refrigerant \ circuit \ yourself \ or \ disassemble \ the \ product \ yourself$ and always ask a professional.

Cooling mode

8.5 A*** SEER Energy efficiency class Design load (Pdesignc) 3.6 kW

Energy consumption, 148 kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.

Heating mode (Average) SCOP

4.6 Energy efficiency class Design load (Pdesignh) Declared capacity A⁺⁺ 2.7 kW (-10°C) 2.5 kW kW (-10°C) (-10°C) Back up heating capacity

Energy consumption, 822 kWh per year.based on standard test results.

Actual energy consumption will depend on how the appliance is used and where it is located.

Heating mode (Warmer) Optional SCOP

Energy efficiency class (2°C) (2°C) (2°C) Design load (Pdesignh) Declared capacity kW kW Back up heating capacity kW

kWh per year.based on standard test results. Energy consumption. Actual energy consumption will depend on how the appliance is used and where it is located.

Heating mode (Colder) Optional

SCOP

Energy efficiency class Design load (Pdesignh)
Declared capacity (-22°C) (-22°C) kW kW Back up heating capacity (-22°C)

Energy consumption, - kWh per year based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
